### Specification of Business Problem

The world's population reached nearly 8 billion which is gradually increasing in day-to-day life, it is more than three times larger than in the mid-twentieth century.

### Business Requirements

When demographers attempt to forecast changes in the size of a population, they typically focus on four main factors: **fertility rates**, **mortality rates (life expectancy)**, the **initial age profile of the population** (whether it is relatively old or relatively young to begin with) and **migration**

### Social or Business Impact

Human population growth impacts the Earth system in a variety of ways, including: **Increasing the extraction of resources from the environment.**

### Literature Survey

The Economic Survey noted that the country as a whole will enjoy the "demographic dividend" phase despite some states transitioning to an ageing society by the 2030s. It said the population in the 0-19 age bracket has already peaked due to sharp declines in total fertility rates (TFR) across the country.
